

# CODING

## **Builds Problem-Solving Skills**

Students learn how to break big problems into smaller steps and find creative solutions.

## **Encourages Creativity**

Coding lets kids create their own games, animations, and stories using tools like Scratch or Python.

## **Prepares for the Future**

Technology is everywhere! Learning to code helps students understand how things work and opens doors to future careers.

## **Boosts Confidence**

When students build something on their own, they feel proud and motivated to keep learning.
